

LinkPoint® E-Commerce

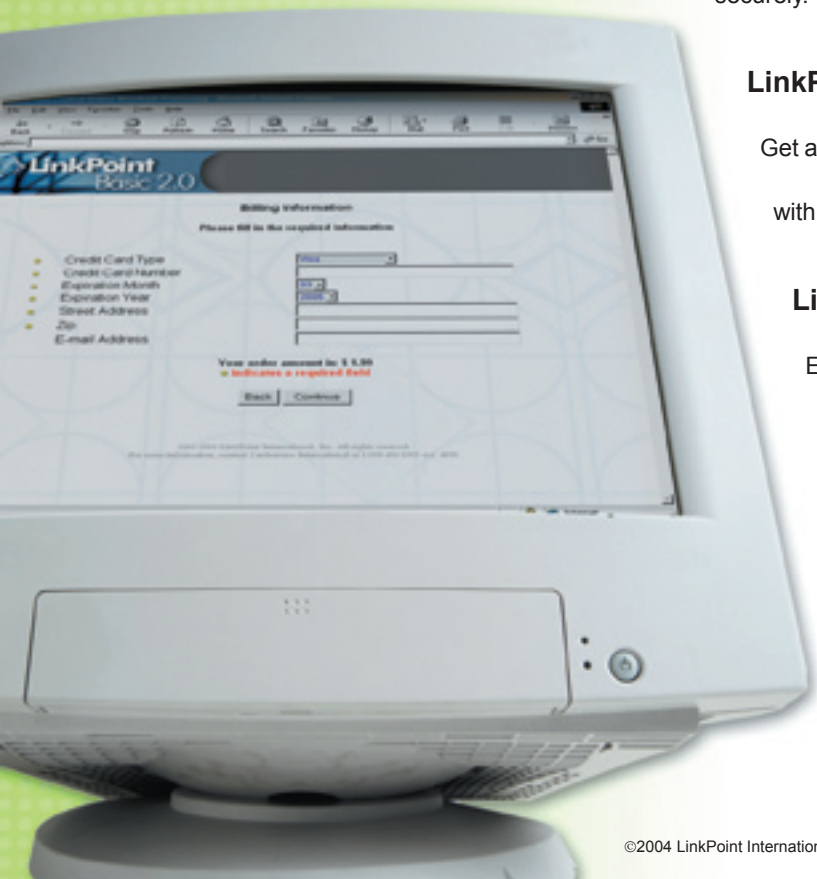

To compete in an online environment, merchants need a fast, secure transaction processor they can trust. Whether your merchants' Web sites consist of a few pages or a vast product database, you can count on LinkPoint to process their transactions quickly and securely.

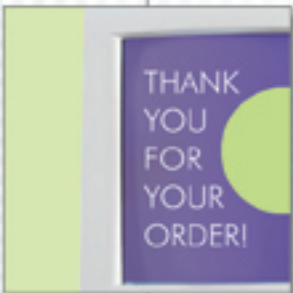

LinkPoint® Connect

Get all the speed, security and fraud protection you expect from LinkPoint, with easy Web integration.

LinkPoint® API

Enjoy even more security, flexibility and functionality with LinkPoint's adaptable application programming interface (API). LinkPoint API provides tax and shipping calculations along with electronic softgoods downloads for music, graphics and software sales. Plus, merchants aren't limited to programming in C—with LinkPoint, merchants have the freedom to choose whatever technology they wish to use on their e-commerce Web sites.

LinkPoint® Connect

- Merchants get all the speed, security and fraud protection, with easy Web integration.
- Anyone who understands basic HTML can integrate this robust, easy-to-use product into a Web site
- Easy store and fraud prevention setup is included via LinkPoint Central
- No secure Web server required means merchants with limited resources don't have to deal with the extra hassle and expense

LinkPoint® API

- Enjoy even more security, flexibility and functionality with LinkPoint's adaptable Application Programming Interface.
- Shipping and tax modules automatically calculate and add tax and shipping to the order
- An electronic soft-good download (ESD) module lets merchants that sell software, images or other electronic files sit back and watch their businesses grow
- Many development languages and platforms are supported, so Web developers can use the technology they're comfortable with

Choose Your Technology

No matter what Web technology your merchants use, LinkPoint has an e-commerce solution to meet their needs.

Technology	LinkPoint® Solution
